Yes--that's exactly what we'll need (and it's more easily customizable than delicious' clouds too, I see.)

This and--perhaps--the RSS feed we talked about, Kristi, and we'll be all golden and stuff.

This looks cool! Should I add things in diigo directly or zotero first? Whatcha want?

Diigo is good for links and linked articles. Zotero is good for texts and articles. So, whatever works for what you got!
